

Family CSI @ Home

Why not become a family detective agency for the day and set up your own mini crime scene.

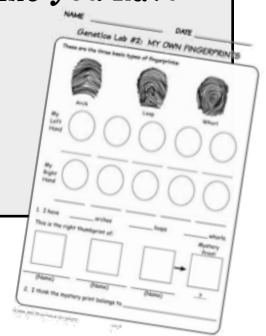

Fingerprinting

Ask your child to take both yours and their fingerprints, in order that they can analyse them.

There are a number of ways you can do this using items you have lying around at home e.g. pencils and sticky tape.

The internet has many links to simple ways to take fingerprints and worksheets to help analyse your fingerprints.

Write with invisible ink

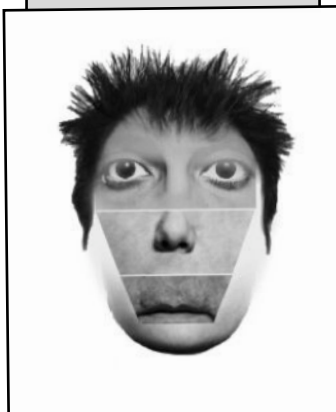

Why not use candles or a white crayon to write a secret note. The message can be revealed by painting over the top with watered down paint.

You can also make your own invisible ink with lemon juice and water. Squeeze the juice of half a lemon into a bowl and a few drops of water.

With a paintbrush use the mixture to write a message on white paper. Once dry hold your paper unto the light to reveal the message.

Photofit

Take part in the photofit challenge and test your observational skills. The website link below sets you the challenge of trying to create a photofit of a person you have only been allowed to see for 5 seconds.

<http://www2.open.ac.uk/openlearn/photofit-me/index.html>

Cut up faces from old magazines and mix and match them together to create your own photofits.
