

Ideas for 2-3's

Communication, Language and Literacy

Making a Map

With large paper and crayons talk about making a map and what would be on the map. Making roads, roundabouts, parks, shops. It may be what is near your house. Add in a garage and cars when you have finished and move around the map talking about what you can see.

Maths

Maths Monsters

If you have a box or large paper paint it in different colours with the children. Then cut out a different shape on each one. Make some eyes and stick on. Make a few shapes that will fit through the holes. Hang them on a radiator or wall, indoors or outdoors. Good fun to post the shapes in the monsters mouths.
(make sure the radiator is not on)

Physical

Chasing Bubbles

Get them running around chasing bubbles. It is a really fun way to get the kids moving and burn off a little energy.

Emotional and Mental well-being

Dressing Up

By allowing children to act out their fears through dress-up and role play, we are helping their emotional development.
